Re: IPC Superfund Site

Dear Messrs. Moyer, Schorle and Steadman:

I am writing on behalf of the Interstate Pollution Control ("IPC") Steering Committee. During the last several weeks, your agencies have made requests for access to the IPC site in Rockford for various purposes, including sampling and inspection. On these occasions, Mr. Chuck Kullberg, a member of the Steering Committee, has cooperated with both agencies providing access as requested.

Although we understand that there may be circumstances in which either the IEPA or U.S. EPA may require immediate access to the site, in order for Mr. Kullberg to make the necessary arrangements for access and/or for the PRPs to arrange for the presence of their consultant (Golder Associates) during any site inspection, sampling event, or other agency visit to the site, Mr. Kullberg and the members of the IPC Steering Committee request that they be given at least 72 hour notice prior to either agency receiving access to the site. Additionally, in

BAKER & MCKENZIE

order that the Steering Committee can take appropriate steps to notify its members and/or consultant as it deems fit, we request that all requests for access to the site be made to Mark Furse, Steering Committee Chairperson, at (312)902-5371, or, in the event he is unavailable, to me. If you are unable to reach either of us, we request that you then contact Mr. Kullberg's attorney, Don Shriver at (815)963-4895.

We in no way intend that this request hamper your agency's ability to obtain prompt access to the site as necessary and appropriate. By establishing this line of communication, however, we hope to make the necessary arrangements for access more efficient for all concerned.

Please do not hesitate to call me at (312) 861-8671 if you care to discuss the Steering Committee's request. We appreciate your cooperation in this regard. We request that this letter be made a part of the administrative record for the IPC site.

Sincerely,

Marcy A. Toney  
(Admitted in the District  
of Columbia)
